

Automotive & Mobility.

GSK. The Difference.

GSK STOCKMANN

Automotive & Mobility at GSK

Our Automotive & Mobility Group has extensive experience in the automotive sector. We play an active part in shaping change in the field of mobility which is particularly characterized by increasing digitalization and interconnectedness. Connectivity, electromobility, car-sharing and automated driving are more than just buzzwords for GSK Stockmann. That makes us not only a competent partner for legal advice with business acumen, but also an efficient service provider who contributes substantially to the success of our clients' projects. We live up to our aim to find tailor-made, innovative and legally reliable solutions for our clients.

Our Services

We unite the relevant fields of legal consultation for the automotive and mobility sector.

- > Protecting technological edge and intellectual property
- > Approval procedures and environmental compliance
- > Governmental affairs – new regulations and public funding
- > Mobility concepts, also in connection with urban planning projects
- > Regulatory requirements for telecommunications, IT security as well as data protection and data security
- > All aspects of R&D, procurement and subcontracting agreements
- > Licensing agreements and distribution contracts
- > Consumer protection, product liability and recalls
- > Joint ventures and cooperations, projects regarding automated driving systems and electromobility
- > Structuring, reorganization and restructuring, including corporate group reengineering
- > M&A projects – investments and divestments using our competencies in IP/IT, regulatory, labor and tax law

Passion for the Sector.

Mobility is a basic human necessity and mobility patterns as well as expectations regarding mobility services are changing rapidly. Environmentally friendly means of propulsion, new resource-saving mobility concepts for inner cities and inter-urban mobility require a holistic approach to technologies and infrastructure as a whole. The increase in digitalization, connectivity and (partially) automated driver assistance systems has crucial influence on mobility patterns, technological concepts and business models. New ideas become reality.

We are passionate about the automotive and mobility sector. Our passion defines our legal advice. Insight into the commercial and technical background is part of our work. Measure us by this standard.

Among our domestic and foreign clients are established but changing players in the automotive and automotive suppliers sectors as well as newcomers in the area of individual mobility.

Passion for Complexity.

Complex projects and problems are our focus. We make complexity legally manageable. Because we know the sector. And because we are proficient at handling the interfaces - those between legal requirements and commercial and technical targets and specifications as well those between the relevant fields of law be they IT-law and data protection or meeting regulatory requirements in R&D, procurement or supply agreements.

Projects, joint ventures and transactions are our core business which we run with a holistic approach towards achieving state-of-the-art solutions. We provide tailor-made advice based on our conviction that cars will be part of our "digital way of life".

GSK. Who we are.

GSK Stockmann is a leading independent law firm in Germany and Luxembourg. The firm focuses on real estate, corporate, banking/finance and projects & public sector. GSK was created in 1997 as an association of lawyers from leading German commercial law firms. Today, our clients can call upon more than 160 nationally and internationally renowned lawyers at our offices in Berlin, Frankfurt, Hamburg, Heidelberg, Munich and Luxembourg. For cross-border transactions and international projects, GSK works closely with a select group of highly respected partner law firms abroad.
