

Automotive & Mobility.

GSK. The difference.

GSK STOCKMANN

Automotive & Mobility at GSK

Our Automotive & Mobility Group has extensive experience in the automotive sector. We play an active part in shaping change in the field of mobility which is particularly characterized by increasing digitalization and interconnectedness. Connectivity, electromobility, car-sharing and automated driving are more than just buzzwords for GSK Stockmann. That makes us not only a competent partner for legal advice with business acumen, but also an efficient service provider who contributes substantially to the success of our clients' projects. We live up to our aim to find tailor-made, innovative and legally reliable solutions for our clients.

Our Services

We unite the relevant fields of legal consultation for the automotive and mobility sector.

- > IP protection - securing the technological lead
- > IT security and data protection, incl. regulatory requirements in the field of telecommunications

- > Joint Ventures and co-operations, especially in development (R&D) and sales
- > Restructuring & Reorganization, incl. corporate reorganizations and group restructurings
- > M&A-projects, investments and disinvestments, including regulation, employment and tax law

Passion for Automotive & Mobility.

Mobility is a basic human need and mobility behavior and the demand for mobility services are changing rapidly.

Environmentally compatible power trains, new resource-saving mobility concepts for cities and interurban mobility require a holistic approach to technologies and the entire infrastructure.

The increase in digitalization, connectivity and (semi-)autonomous driving assistance systems has a decisive influence on mobility behavior, technology concepts and business models. New ideas become reality.

We are passionate about the Automotive & Mobility industry. Our dedication distinguishes our legal advice. For us, economic and technical background knowledge is an integral part of this. You can measure us on that.

Our domestic and foreign clients include traditional and evolving players in the automotive and supplier sectors as well as newcomers in individual mobility.

Passion for complexity.

Complex projects and questions are our main focus. We make complexity manageable from a legal point of view. Because we know the industry.

Complex projects and issues are our main focus. We make complexity legally manageable. Because we know how to handle the industry and its interfaces - those interfaces between legal requirements and economic and technical specifications and requirements as well as those between the relevant legal fields, whether IT law and data protection or compliance with regulatory requirements in R&D, purchase and supply contracts.

Projects, Joint Ventures and Transactions are our core business, which we pursue with a holistic approach to customized solutions. Our legal advice is a manufactory with the understanding that the vehicle becomes part of our "Digital Way of Life".

GSK. Who we are.

GSK Stockmann is one of the leading independent commercial law firms in Germany and Luxembourg with a focus on Real Estate, Corporate, Banking / Finance and Projects & Public Sector. GSK was founded in 1997 as a merger of lawyers from a number of reputable commercial law firms. Today, more than 180 lawyers and tax consultants in Berlin, Frankfurt am Main, Hamburg, Heidelberg, Munich and Luxembourg advise German and international clients. In cross-border projects, GSK works closely with a selected circle of respected partner law firms abroad.
